SUMMARY

I'm a polyglot software engineer that obsesses over attention to detail and enjoys developing and deploying software that solves real-world problems.

EDUCATION

National University of Sciences and Technology (NUST)
Bachelors in Software Engineering

H-12 Campus, Islamabad
2021 – 2025

PROJECTS

Presently: Smart Attendance Management with Facial Recognition

- **Goal:** Build a full-stack web application to automate attendance and eliminate proxies using real-time facial recognition through AI model integration.
- Trained a Haar cascade classifier on labeled student images; exposed model inference via a Python FastAPI microservice consumed by the frontend.
- Developed a MERN stack web app with webcam-based face capture, Vercel-deployed React UI, Node.js API routing, and MongoDB attendance logging.

Darwaazay: Real-Time Chat Rooms Application

- **Goal:** Build a censorship-resistant platform for real-time group discussions with room-based control, moderation, and activity tracking.
- Developed using Django (MVT), leveraging its ORM and authentication system; integrated Jinja templates to serve dynamic HTML views.
- Implemented full CRUD for rooms and messages, user profiles, filtering/search, and authorization; validated system through extensive unit tests across views, models, and forms.

LEADERSHIP & ACHIEVEMENTS

FICS Finalist

Spring 2025

Advanced to the final round of the national competition with a prototype in development.

Captain, SEECS Football Team

Spring 2025

Captained SEECS to their first NUST Inter-School title in 7 years.

Captain, Champions Trophy Football Team

Spring 2024

Led team to victory in the university-wide Champions Trophy tournament, securing a clean sheet record across all knockout matches.

SKILLS

Languages Python, C++, SQL, JavaScript

Frameworks Django, Flask, MERN, Laravel

Tools Git, Postman, RapidMiner, Tableau, Jira, Power BI

CERTIFICATIONS

The Web Developer Bootcamp

Instructor: Colt Steele, Platform: Udemy - Issued 2022
